Environment

Do you want to work in a dynamic IT consulting and software company with a sound strategy as a Java Solution Engineer for the development of Java/J2EE software solutions?

Main duties

Analysis, design and programming of Java/J2EE software solutions browser oriented user interfaces / frontends. In addition, you will be engaged in project work by defining scope, requirements & specifications and also documenting applications.

Place

Our office is situated downtown in Basle.

Start

Immediately or per agreement

Requirements

You have very good Java knowledge and are comfortable with APIs and frameworks of J2SE and parts of J2EE. Besides you are quick minded and have a comprehensive knowledge in the following technologies and topics:

- Windows/Sun Solaris/Linux
- Arbeiten mit Versionierungssystemen
- Eclipse
- HTTP/HTML/CSS
- XML/XSLT
- SQL
- Oracle
- Use of the usual open source Java tools and frameworks

Education

Bachelor or Master degree (University, ETH) is the basic requirement. Any real world experience is a plus, but not required. You are self motivated and you work independently and well with others in a team. Stability and quality of the solutions provided as well as meeting the deadlines is key to us.

Please do not hesitate to contact us with any remaining questions or send your application directly via email or mail to the following address:
